SERIOUSLY

WHO ARE WE?

The world is not more money for war preparedness, but more money for the full enjoyment of peace. More and more people are demanding that national defense should not be a question of whether or not to go to war, but a question of what kind of world we are going to make. It is the kind of world which each of us helps to make by the way we live and the way we think.

America's Entrance in the World Court

The London Court of Justice is one of the most important steps in the world's move toward world-wide peace. By participating in the work of the World Court, America has become a part of the world-wide movement for peace. The Court is a place where nations can settle their differences in a way that is fair to all. It is a place where we can work together to make the world a better place for all.

Looking Ahead

The future belongs to those who believe in the beauty of their dreams. We must work together to build a world where everyone has a voice and a chance to achieve their dreams.
