President Gives Opinion of Survey
Dr. Todcil Investigates Goodwill

The recent investigations and reports by the Cornish Foundation on the athlete's situation in American colleges has received nationwide comment.

The charges of minor and major cases of professionalism among most of our colleges in their football teams is the main point revealed by the survey. A complete and comprehensive discussion of the conditions has been published which places the burden of action directly to the president and athletic directors.

Throughout the country the heads of the individual colleges are taking action, or planning to act, on the recommendations. A president of the College of Puget Sound made a broadcast comment.

The Carnegie Corporation has performed a real service in bringing about this investigation. The college authorities and managers have been informed of the reports and have taken action accordingly.

The investigation is not intended to create any further bad will, but to clear up the situation, to prevent the multiplication of these cases, and to rectify the situation, so that the college authorities may feel sure that the monetary problem is no longer a factor.

The situation is now one of education, of training, and of the whole college problem. The college authorities are realizing that the money situation is no longer a factor, but that the college authorities must first of all try to make their colleges efficient, and then to change the situation. The college authorities are realizing the importance of the situation, and are working hard to make their colleges efficient.

The Carnegie Corporation has already given more than a million dollars to colleges for this purpose. It is hoped that this money will be used for the purpose of making the colleges efficient, and that the college authorities will work hard to make their colleges efficient.
