Groups Request Cut in Rush Period; Action Is Deferred

The following is the petition which nearly 50 fraternity and sorority men and women presented to the college faculty at its last regular meeting Thursday, January 3, for its seclusive consideration. It was not read. Dean Raymond O. Decker said action on the petition would be deferred pending the return of Dr. Edward H. Todd from a trip East.

To the Faculty of the College of Puget Sound:

The sponsors for the Alumni Share of the total enrollment received refunds or warnings at the end of the first ten weeks.

4. At best it is a difficult task for any college faculty to reconcile itself to adjust itself to its own new environment and to bring the world to its concepts of the new student's chance to assume the proper attitude toward their studies and college life in general.

5. Parents are objecting to having their students during the physical strain of a six weeks' social program and the necessary social effort upon the health of both rushers and community.

6. This past semester it will be decreed to the sorority men that a six weeks' rush period is a financial burden. If we can in any way reduce this financial burden without seriously affecting rushing, we may work in the great need of society.

The social groups of the College believe that a shortened rush period at the first of the school year is the most practical method.

7. We consider the possibilities of both shorter and longer rush periods and their effects on the future of the rush period. We all believe that not more than six weeks at the final of the fall semester is the most economic period.

We therefore submit this opinion to the faculty with the request that he be actuated accordingly. We would greatly appreciate a decision on the question of rush periods near future, and we welcome any chance to cooperate that we may obtain that plan which is best for the whole student body.

THE SKI CLUB

He who fights an uphill battle and not only achieve- his aims, but also exceeds them is to be commended. The Ski club's progress and portrait of fifty-four, is one to merit such con- duci.

The administration has now duly recognized the club as an official campus organization. The club has several media scheduled, with more in the offing, indicating the great interest afoot in the sport of skiing. Since the skiers obviously cannot expect their trips to be financed by the ARCPS this year, and yet having the desire to accept their invitations with both men's and women's teams, they turned to the business men of Tacoma. The Tacoma Gym club agreed to see that the Club would send its teams, thus advertising the sport.

The next move to follow is the ski club's attempt to have skiing recognized as a minor sport with proper aid. Central Board is expected to act on the question today. In view of all that the group has accomplished, it is expected that they go to Thomas, Johnson, and the College of Puget Sound, it seems only fair that the students' representatives choose to further the ski club's progress and prominence skiing a minor sport.

An ENTHUSIAST is a man who takes his ideas seriously and is thrown on his plans and has to push them to push over his ideas. But don't try the same idea. If you try an enthusiasm will be be as wise. And remember the lady who was足球 practice. She was still having their game to play to decide who will share the trophies with the Gamma's. The Titans are occupying the lower berth.
