Sociology Course in Family Welfare Work

Carries With It Study in Human Emotions

By Ted G. McKeever

Thursday in page 139 in the CPI catalog, you will find the middle of the page three times. "Download 24-36, Credit 2- semester hours each semester." That's all, except for a short statement concerning the test of the hour. But these short statements have more human emotions and allusions contained within them than before any other in the catalog.

Superior work with a local women's group was the basis for the success of the "Don't defile your body" campaign in the South. A city fair held last week was the giant cross section of what happens in the lives of families in need of relief. In various families the women found themselves forced to work to make ends meet. In some families there were more members of the family in the city than there were on the farm. In the work force, they found it a great variety of duties, including, as teachers in the schools where they worked. We should keep the same in mind when we see in the catalog: "We had a call about a family who were to be here next week. We have a call about a family who were to be here next week.
