Trail Asks Students to Elect On Basis of Issues not Politics

(Editors)

This year's student body elections, which will be held starting Monday, March 27, from all profession data sheet look to be an especially interesting one. A few additional issues for the offices this year as in any other recent year.

One of the most long-range issues of any College of Physical student election run is the school breaks down into as many different blocks or cliques as there are candidates, and the associated election becomes a fruitful ground for power by the fraternities, sororities and the Trail. The next student attempt, and using the election as the basis of issues, not as an office holder. The election will be attempted this year. The issue of March 30, in order to distinguish from as cut and dried as possible in each of the positions will be requested to state their platforms, and in the election which will be for the Central Board—on the following day. In the results of the Trail and other interested groups' campaigns, leaders of all parties are up in the student mind.

1. What part should an ASCPS play in the presentation of Chapel programs?

2. What are the means of our athletic program compared to the student-specified activities.

The Trail onto the candidates for the Student body to keep this election on the rather equal depth of a public election, and select the students as a whole for its normal education.

We ask that the students vote on the candidates on the basis of the mutual agreement on votes.

French Exhibition Now In Galleries

The French Exhibition which is now hanging in the galleries at Jones Hall is one of the most valuable exhibitions since the first two exhibitions last year. The pictures have been loaned by owners of private collections and museums and will be displayed until March 21.

World Decline—1939

One of the items of the decline of nineteenth century civilization is that in the past 35 years the number of oldsters in the United States has increased from 6.6 million in 1900 to 23 million in 1939. This increase has been due to the decline in the birth rate and the increase in the death rate. The birth rate has declined from a high of 23.4 per 1,000 in 1880 to a low of 13.5 per 1,000 in 1939. The death rate has increased from a low of 10.5 per 1,000 in 1880 to a high of 14.5 per 1,000 in 1939.

This decline in the birth rate has been due to a number of factors, including improved medical care, better nutrition, and increased awareness of the importance of family planning. The increase in the death rate has been due to a number of factors, including improved medical care, better nutrition, and increased awareness of the importance of family planning.

The decline in the birth rate has been more pronounced in the western states, where the birth rate has declined from 25.0 per 1,000 in 1880 to 12.0 per 1,000 in 1939. The death rate has increased from a low of 9.0 per 1,000 in 1880 to a high of 16.0 per 1,000 in 1939.
