The Departments
The University of Puget Sound is a diverse community: faculty from all over the United States and students from the Atlantic Seaboard, from Southern California, from Hawaii and even Asia. The University provides opportunities in an array of academic areas including the traditional and the innovative. The emphasis on liberal education is reflected in the University's Core Curriculum which according to Pres. Phil Phibbs, will provide "an education for a lifetime."

In this college environment students are learning how to think for themselves, how to ask the right questions, and how to make decisions that will effect the rest of their lives.
Presidents Staff: David Dodson, Dean of Student Services; Aaron Peterson, ASIPS President; Shirley Bushnell, V.P. University Relations; George Mills, Director of Admissions; Greg Brewis, Asst. to President; Wilma Cox, Director of Public Relations; Ray Bell, V.P. Finance; President Phillip Phibbs.

Dean of Students Staff Front Row (L to R): Karen Grove, Kathy Witt, Linda Rust, Mae Sprenger and Sue Ahluern. Back row: David Dodson, Bob Stremba, Phyllis Lanz, Judy Sweeney, Eula Mazique, Jim Davis and Seri Soldiarios.
The backbone of the University lies in the proper administration of goals and priorities set forth by our Board of Trustees. Led by President Phillip M. Phibbs, Ph.D., the University Presidents staff has gained the reputation of being not only efficient and academic but sensitive to student concerns and problems.

President Phibbs is assisted by Vice-President of Finance Roy Bell, Vice-President of University Relations Shirley Bushell, Academic Dean Thomas Davis, Dean of Student Services David Dodson (the newest member of the staff), and the Assistant to the President Greg Brewis. Together these people have invested hours and still will to insure that the academic educational standards are attained.

Yet, no other institution would be so lucky as the University of Puget Sound to have a more successful Board of Trustees. With the dedicated tenure of Chairman Norton Clapp, the University has undergone the greatest positive developments that to most schools are only dreams. Along with President Phibbs and Norton Clapp, the University trustees not only give their time but also opportunities for the betterment of academic curriculum, student life and physical plant.
The Learning Skills Center offers students the opportunity to improve their math, writing and study skills through individual sessions or small group courses and workshops. The center also provides tutorial service in specific areas.
The people who work at Collins Library are here to destroy the myths that libraries hide themselves from view, that they are dark,omy, unapproachable places. We are here to answer your questions and to help you use library resources. Our main purpose is provide service to you, our users.
In the beginning ... and from that point on ... History at the University of Puget Sound. Whatever one intensifies in Ancient Greece, Rome or China, the concept of what has happened, and the record of that event, with what could, might or probably will happen in the future always plays in the minds of the professors of History.

**Front row:** Ali, Florence Phillippi

**APGS Front row:** Dana Madden, Emily Read, Leslie Taylor

**Back row:** Tina Marie Ybarra, Anita Pati, Rich Heller, Karen Koehmstedt
The Politics and Government Department at UPS has had a busy year. As well as continuing and encouraging the understanding of the ideas of politics the staff is involved in other activities as well. The department hosted the Pacific Northwest Political Science Convention this past fall in which department head Paul Heppe is president. Both Heppe and Priscilla Regan have spoken at national conventions and many other members of the staff have presented papers to academic professional meetings. David Balaam has written a book entitled "Food Politics, The Regional Conflict", which has just recently been published.

Associated with the department are two organizations, APGS and the Model UN. Along with these and the talented professors, students may become involved and easily develop intellectual awareness as well as learn the basic concepts of government and politics.

Faculty: Paul Heppe, Priscilla Regan. Not Pictured: David Balaam, Craig Gunter, Arpad Kadarkay, and Katherine Petrinovich

Model UN
The largest school at the University of Puget Sound is the School of Business and Public Administration, with 30% of the total number enrolled in the University. The school boasts a faculty of 17 who advise and counsel as well as administrate the courses needed for the Baccalaureate and Master's degrees. In addition to the many seminars, lectures and extracurricular engagements, like field trips and guest speakers, the academic environment is enhanced with two Honorary business Fraternities, Alpha Kappa and Phi Chi Theta.

Dorothy Koehl, John Rutland, John Dixon, Keith Maxwell, Enna Roulier, Cleveland Futch, Denis Umstot.
Phi Chi Theta Front row: Brian Williams, Lynda Shepard, Susan Tanouye, Billie Adkisson Second row: Jeff Wissing, Mary Wojtulewicz, Elizabeth George Third row: Lisa Bailey, William, Kaneko, Joy Sidman Fourth row: Stephen Eronemo, Sandy Black, Chris Llobregat, Daniel Bader, Caty Shanholz, Mandy Yamauchi Fifth row: Doug Collier, Prof. Roy Placey (Honorary Member), Stuart Morrow, Tami Stukey Sixth row: Angela Pratt, Andrew Spence, Richard Okiuye, Carol Deutsch, Doris Anderson (Honorary Member), Jim Parker, Janice Kugler Top row: Todd Startzel, Jeffrey Blauer, Kevin Stormans, Caroline McDanels, Grey Sundberg, Jerry Leishman

The problem of the economy becomes quite clear when studying within any Economics course. Our faculty carries a distinguished air which, believe it or not, makes the study of Economics fun. The course books and texts which are used at Q.U.P.S. were authored by our own Michael Veseth, that allows a multiplier effect upon our own institutional economy. A scholarship fund for economics students receives the royalties from texts written by our economics professors. In any class you can expect to hear "Ceritus Parabus", "Bon Ties" as well as "Bon Bons" to lighten your day.

(L to R) Bruce Mann, Russ Singleton, Ernie Combs, Michael Veseth, Wade Hands, Doug Goodman.
Computer Science & Math

The Computer Science and Math department is a combination of two fields which are growing in strength and demand. Students are attaining their respective degrees to pursue graduate study or to apply it in a business environment. The mathematics department offers basic and specific service courses for the general student body and specialized courses for the "major" students.

Chairman Ron VanErkevort and faculty concentrate on offering the best possible alternatives for their students in this growing area.

The program of Aerospace Studies at UPS offers a diverse curriculum as the courses taught deal with different facets of flight, from Private Pilot Ground School to Advanced Air Force ROTC Training. The courses offered are in three sections: general military courses, professional officer courses, and field training courses which are conducted at selected Air Force Bases.

Dept. head Col. Thomas Schaefer is a new arrival to the University this year. He adds somewhat of a uniqueness to both the dept. and the University in that he was part of the group held hostage in Iran in 1979-80.

Two societies affiliated with the Aerospace department are the Angel Flight and the Arnold Air Society which, along with the expertise of the staff, give students the opportunity to obtain their desired knowledge and goals.
Chemistry

Along with those students preparing for a professional career in chemistry, this department presents a flexible, broad based curriculum conceived to meet the needs of students who are training for careers in teaching, science writing, medicine, dentistry, business, Physical therapy and engineering.

The staff extends over a particularly wide range of expertise. Not only are the basic sub-disciplines covered but the members are also interested in forensic chemistry, polymer chemistry, clinical chemistry and nutrition and environmental applications. The students are also given a considerable amount of space for research and an unlimited access to computer terminals.
With the addition of a new graduate student, the Geology department continued to look for its own "piece of the rock" in 1981-82. The long hours spent by students on the UPS rockpiles were well worth it for those in search of a Geology major. Hopefully, the department will continue to grow and bring Geology a mine of new talent in future years.
The Department of Physics brings forth a basic natural science with applications in many other related and allied fields — chemistry, biological sciences, engineering, astronomy, oceanography, environmental sciences and Mathematical physics. The program prepares students for employment in industry or government, or for advanced study in graduate school.

Faculty Standing: Jim Clifford, Frank Danes, Fred Slee
Sitting: Bert Brown, Marlin Nelson
The Biology Department at UPS offers an undergraduate program which mirrors the scope of modern Biology, from molecules and cells through organisms, populations and ecosystems.

This division of the sciences offers a wide range of facilities that benefit students interested in graduate studies from the Pre-Medicine to Marine Biology. The James R. Slater Museum of Natural History and the honorary Phi Sigma sponsoring seminars, field trips and tutoring; it is no surprise to find that the Biology Department is among the most highly respected in the state of Washington.
Physical Therapy and Occupational Therapy

One of the many attributes at UPS is the exceptional OT/PT program. Many students were attracted to UPS for this educational opportunity.

Occupational Therapy strives to help an individual form daily tasks related to work, play and self care. Physical Therapy works toward helping an individual gain pain-free strength and coordination.

The objectives of the school of OT and PT consist of attaining the knowledge, skill, and attitudes required in helping the disabled. One may have noticed the PT students hobbling around on crutches and wheel chairs. This is experienced in order to teach the students what the general attitude toward the disabled actually is.

These two highly competitive programs are extremely demanding in terms of course study. The OT program accepts forty students per semester while the PT program only accepts thirty students out of 150 applicants per year.

Physical Education of the University of Puget Sound is an integral part of the academic curriculum. The backbone of the program lies with the swift and precise guidance of the Director and his staff. From varsity football, varsity women's basketball, intramural frisbee, golf to scuba diving, dancing, and bowling — your tastes are only tickled by the numerous offerings. A knowledgeable staff who teaches basics, shares strategies, and enjoys the sports taught, creates a pleasant environment for the physical part of your education at U.P.S.

Faculty (L to R): Ron Simonson, Tom Cross, Dawn Bowman, Roberta Wilson, Joe Peyton, and Chet Hovde.
Physical Education
Our mission is to shape the minds of the future. The U.P.S. School of Education deals with the primary development of elementary education, and secondary emphasis on the instructional fields. Not only the reading, writing, and arithmetic, but musical, liberal philosophies and strategies involved in the academic education of our young. Without the corny-overtones one ought to feel fortunate that our School of education is producing exceptional academic missionaries to lead and show our children.

**Faculty:** Dick Hodges, Barbara Holme, Pam Stevens, Linda Cockrell, John English, Ray Roussin, Milton Hogt, Joan Rapp, George Miller, Norm Heimgartner, Edith Richards (*standing*) Bob Steines, Bob Hostetter
Psychology

Psycho ... ology!! Proteinig knowledge, our Professors of Psychology are enabling the students of the University of Puget Sound to understand primal-Freudian tendencies that dictate our every motivation. From the blank slate we are born with — through the major fundamentals of our frame-of-reference to the complex human relations and mutations that exist in our world today, the Department of Psychology enjoys and encourages the study and comprehension of the mind.

Theodore Sterling, Cynthia Envin, Michael Tate, Donald Pannen, Ernest Graham. Seated: Stephen Gilmour,’ Margaret Wild, Daniel Envin.
Religion and Comparative Sociology

The Comparative Sociology department at UPS offers a wide variety of subject areas ranging between a general liberal arts experience to related graduate and professional programs. The opportunity to develop knowledge and skills and learn theories of analysis and communication are readily provided by the talented teaching staff.

As well as being involved in University activities some members of the department are writing and researching on various topics. Margaret Nowak is doing a study on Tibetan refugees while George Guilmet has just recently written a manuscript on entropy. Leon Grunberg has had a book published and at the present time Ann Neel is on sabatical in Missouri doing research for a feminist project.

Led by department chairman Charles Ibsen the Sociology department meets both personal and professional goals of the students and contributes to the academic success of the university.

The concept of the UPS Religion department lies with ability to experience and learn from not just one thought or organized religion but from as many as you can. With a major role in the Pacific Rim program and on campus the exposure will include Judaism, Christianity, non-belief, and Islamic as well as others and their effects upon history.

Religion Faculty: Richard Overman, John Phillips, Del Langbauer, and Darrell Reeck.
The power of knowledge lies in the Philosophy Department of U.P.S. With the chairman, Rev. John Magee, the department will lead you from the principles of Kant and Dante, through Ethics and then to your own Philosophical premises.

(L to R) John Magee, Bruce Altshuler, Doug Cannon.
Pi Kappa Delta (Forensics) Front row: Steve Geringer; Vice-President, Isabelle Bauman; President, Kris Susser, Ken Pfau. Second row: Laura Davis, Adrian Badger, Larry Baumuler, Bernie Pratt; Treasurer. Third row: Jeanette De Jong, Pancho Menendez, Faye Jackson, Kristin Mesler. Fourth row: Sandy Black, Joel Gleghorn, Ann Lambert; Secretary, Mark Anderson. Back row: Kris Davis; Coach, Mark Turner.

Alpha Psi Omega (Dramatic Fraternity)
Communication and Theater Arts

The Communication and Theater Arts Department offers the student a combination of skills for efficient and effective communication as well as a knowledge of the history and technology of modern theater.

This active and popular department is supplemented by several groups including the Phi Kappa Deltas (Debate and individual events team), Readers Theater, and Alpha Psi Omega (Drama Fraternity).

Readers Theater (Above): Kristin Messler, Jeanette deJong, Ron Chatman, Adrian Badger, Faye Jackson, and Larry Baumiller.

Faculty Sitting: Kris Davis, Rick Graves Second row: Tom Somerville, Burrisinger, Mary Broz, Louise Bundy, Janet Neil, David Droge, Bonnie Spillman Top row: Gary Peterson, Carol Josslyn
Foreign Language

Oh la can ee spanika-or-come-oh-tally-vve truly depicts the discipline of a foreign language. With three program houses—Spanish, German, and French—students have the opportunity to speak within their major tongue 24 hours a day or however long they are within the confines of either the language classrooms or their house. Also a conversation is encouraged once a week between students. From Archaic to Romantic, languages live at U.P.S.

(L to R) Werner Schultz, Barbara Beckman — Sharon, Dan Clouse, Esperanza Hurza, Renate Hodges, Claudia Mays, Michel Rocchi, Front — Jacqueline Martin.
A strong department begins with its personnel and the English department is blessed with a prestigious entourage of professors.

Students ponder and study the great literary works from the past as they strive for proficiency in their writing skills and knowledge of the world's greatest authors.

Chairman Tim Hansen made a major contribution of the new literary review published by ASB, The Crosscurrents Review.

Faculty Sitting: Esther Wagner, Ralph Corkrum, Barry Bauska, Rosemary Van Arsdale Back row: Phil Hager, Chris Rideout, Frank Cousens, Michael Curley, Florence Sandler

The English Majors Association (below).
The Art Department, under the direction of Bob Vogel, is increasing their diversity in the many facets of Art. From Art History of the Renaissance to Ceramic Sculpture allows UPS the artistic influences and abilities on campus to develop and sophisticated. The Art experience at UPS presents itself in an intriguing and exciting way which merits the complements of the University for methods used in teaching and sharing.

(L to R) Bill Colby, Bob Vogel, Ronald Fields, Ken Stevens, John McCuistion.
The School of Music accommodates students pursuing Bachelor of Music degrees in voice or any of the orchestral instruments as well as Music/Business degree, Music Education or a bachelor of Arts degree in music.

Rehearsals and individual practice schedules often confine UPS music students to the music building practice rooms. However, their notes supply background entertainment for many a slow lecture as the music travels the campus. A year-long supply of concerts and recitals featuring top quality guest artists as well as the school and community groups, provide tremendous opportunities for all to relax and enjoy the fine level of musicianship upheld here at UPS.
