I received the UEC grant this summer as well as the Summer Research Scholar grant to fund my research. I used the \$500 that was given to me through the UEC grant to fund my drive from Tacoma to McKenzie Bridge, Oregon, as well as for camping expenses. Seven University of Puget Sound students, including myself, took three cars to travel to McKenzie Bridge as well as the sample site over the course of five days and four nights. While there, my team collected over 150 samples for my senior thesis on the lava flows in the region.
