FROSH! The Puget Sound Trail

WELCOME

From numerous plans and summer activities we gather in these halls for mundane preparation and college sociability. To those who are new with us for the first time are many adjustments necessary to college life and the formation of new friendships. To the old students the action never stops and there is a newer part in their thoughts and the renewing of old acquaintances and friendships. A deeper and many-rejoicing meaning to the days ahead.

For everyone there in a welcoming, a heartiness and spirit of good will as never existed at Puget Sound before. There are many activities already in a good start of helpful cooperation and in the weeks to come will exceed all past years in its good results and in the scope of the work. The froshes bid us our morning greetings and afternoon our awakens. There is a job and an interest for everyone else even whether old or new. May there be someone to lend himself to the accomplishing of each task that awaits us in college that our lives both in experience and human contact may be useful to one another in the time to come. froshes are freshmen a knowledge of a college, a background with in and an organized class consciousness in which no other freshmen class has been privileged to have. We sum up to develop that consciousness and would it be the benefit of your Alma Mater. As individuals we invite you to serve and take part in the activities that best suit your interest and ability.

Ungerveteranen should be prepared to assume positions of leadership and responsibility. You are examples for those who come after you. Whether old or new, if you are such your responsibility is the greater. It behooves us all to strengthen the activities that we have received from our Alma Mater and our college environment.

I felt if it were possible to gather up the froshes in Puget Sound and in behalf of the Associated Students to partake not only of the fun in college life and give to the best of yourself to your college and student activities.

Deadly Gangs Lurk Around Campus

Prove to Be Only Frosh and Sophomore Engaged in Effort to Aid College Activities

A raid on the halls of residence last night revealed the presence of an unusual gang of students who have been active at the college for several years in the soliciting of memberships for the Associated Students, an organization which has been in existence for several years. These members of the organization are known to the students as the Associated Students, and the organization is the legal successor of the Associated Students, which was dissolved last year.

The Associated Students have been active in the soliciting of memberships for several years, and it is believed that they have been successful in their efforts. The Associated Students have been active in the soliciting of memberships for several years, and it is believed that they have been successful in their efforts.

A number of years ago the number of years squad and Harry Parker, veteran of the University of Washington Flasky halfback from last year, to the Loggers as quarterback who directed the offense. Parker took two touchdowns. His experience should be well utilized in so many men.

Dr. E. R. Moeller, Columbia, Ohio, speaker of the Anti-Stress League of Ohio. He has three dogs that should be well known.

JANUARY 10TH

LEMON TO HELP COACH

Dean Julius C. Leonard who was, in addition to the many other public duties he has assumed, football coach at Gettysburg College. His name is associated with the Logger, since he has been an important man at the college and Track Coach Royer who combines the two.

"Why does Alice always speak with her back to the door?"

"Because she has no ears."—Lemon

"The Right "The* Pager."

"Prayer of a Student"—Morgan

"Dear Lord, in the battle that goes on through life, I ask but one fact that can make the same prayer as the winners go by."

"Do not be afraid of the silence that will be the body of our first year in the Northwest Conference.

―THE AXE―

Prof. Le Penseke, former Lincoln College student, has returned to school and is making a strong showing on the basketball court.

"ROMEO" Murnane, Washington assistant quarterback, had both of his arms broken last year, but he has made a miracle last year for the Loggers.

Frank Wilson is showing the other schools how to guard them. He has broken his left hip and will be out of action for the remainder of the season.

OUR NEW COACH

Lemons and Huskies will Meet Oct. 22

"From Logs to Fruits"—Morgan

The Hills of Puget Sound will be the setting for the most exciting game of the season, the annual battle with the University of Washington. The Loggers have been preparing for this game for some time, and the Huskies will be a tough opponent.

90,000 Wheelbarrows in one hand

A button is pressed. An electric motor goes to work, followed by another and still others until twenty sections of a belt conveyor four miles long are in operation.

Through an abandoned mine runs the Puget Sound Trail, a giant wheelbarrow carrying nine thousand tons of coal per day in a steady stream from the mines to the coal barges on the Monongahela River. One man controls it with no more effort or concern than pressing a switch button. Electricity powers it.

Not only conveyor belts of all sizes, shapes and kinds, but also hoists, tractors, cranes, elevators, stackers, locomotives, and other material-handling equipment have gained flexibility, dependability, and ease of control through electric motorization.

Moving things in one way or another is the educated man’s work in life. And electricity, everywhere, in his command, is moving more and still more of the things which move this new world of ours.
