Chapel Raises Traditional Bell
A "call to the meeting place" will resound across the University of Puget Sound campus when a 150-year-old bell is placed on the Kilworth Memorial Chapel Oct. 28 at a 12:30 dedication ceremony.

"Our tradition goes into the chapel," says Mr. R. Franklin Thompson, president of the university. "The bell was shipped around Cape Horn over a century ago to be placed in a Portland Methodist church."

Completing a new church, that congregation re-established the bell at another site. This church was later razed and the bell was sold at auction.

During one of his many trips, Dr. Thompson heard the story of the bell and located the eastern Washington farmer who purchased the bell and used it to call his farm hands to meals. Dr. Thompson persuaded the farmer to donate the bell for use in the new campus chapel. A crane will raise both the bell and the steeple to the top of the yet-unfinished Kilworth Chapel during the ceremony.

Dorm Hours Stretched
The nightowl population of UPS has scored a victory, as women's dorm hours have been extended until 11 p.m. in accordance with the new law.

Aside from an apprehensive minority who disapproved of the change, most of the women on campus were in favor. However, some who did want the new hours almost unanimously specified that the Student Center and the Library should also be kept open late.

It is hoped that the extension of hours will eliminate the need for many work and education cuts, as well as allowing the students extra time to use the library facilities.

Those opposed to the new law argued that an extra hour of study time would not be enough compensation for an extra time it would take for the dorms to quiet down at night. The argument is considered valid, and for this reason, the new hours are being put into effect on a trial basis.

Peace Corps or Sister U?
CB Debates Soph Altruism

By ROY JACOBSON
Central Board members agreed this week that the sophomore class should channel their inherent altruism into some sort of project, but they couldn't agree on what.

Ralph McEwen, sophomore class senator, suggested another School-to-School program like the one last year's freshman class initiated. Last year's project, money was raised to help the Peace Corps build a school in Brazil, but no tangible returns have come in on the project, and several members questioned the idea of beginning a similar project until some results are obtained on the first one.

Darrel McClune, last year's freshman class president, said he talked to someone in the know in Washington D.C. about the progress of last year's project. He said he was told construction had been slowed because the Peace Corps representative in the area who had been working on the project had returned to the U.S. and also because the people were busy now harvesting their crops before the rain starts.

Clay Lopes said the sophomores should wait for results on last year's School-to-School before starting another one and then throw in for consideration an alternate project suggestion of his own.

Lopes said that rapport between UPS and its sister university, Kita-Kyushu in Japan had fallen off recently and that maybe the sophomore class could do something to bolster it. According to Lopes, the Japanese communists had swept student body elections there recently, and they are presently on an anti-U.S. program. Lopes told the members that here was an excellent opportunity for the sophomore class to get their feet wet with East-West relations and serve humanity at the same time. He said Kita-Kyushu needs a new UPS display in its Economics textbooks.

Gov. Men Interview Here November 1
The Civil Service District Director of College Relations and four representatives will be in the Placement Office Tuesday, Nov. 1, to answer questions and inform students of Federal employment opportunities for college graduates.

Federal employee workshops in thousands of offices, laboratories, and installations throughout the U.S., in the territories and in most foreign countries.

The Placement office advises anyone interested to make an appointment as early as possible to be sure of an interview with the best person able to answer specific questions.

This Week in the Placement Office
Monday, October 31 — The American Institute for Foreign Trade.
Monday, October 31 — Service Representative Examination for positions in the Social Security Administration.
Tuesday, November 1 — Civil Service Career Day.
Friday, November 4 — U.S. National Bank of Oregon.
Friday, November 4 — The Upjohn Company.

Selection of Store Sites Speech Topic
H. Robert Barr, site development manager for Associated Grocers, Inc., will speak on the methods of selecting a store site Tuesday, Nov. 8, at 10 a.m. in McIntyre Hall room 210, sponsored by the Alpha Kappa Psi and Phi Chi Theta.

Barr was formerly marketing research manager for the Frederick Baker advertising agency in Seattle and Marketing Research Manager for the Seattle Times. He is past president of the Puget Sound chapter of the American Marketing Association and has been active in city and state civic affairs.

Inflation Jacks Up Tuition

$200-a-Year Increase Set for Next Two Years

President Promises Aid for Needy Students

The cost of a University of Puget Sound education is going up next fall, according to R. Franklin Thompson, president of the university.

Beginning September 1, 1967, and effective through the academic year 1968-69, annual tuition will be increased from $750 to $800 and the General Fee will be increased from $80 to $85 for the academic year.

Students, Profs Analyze Need of Psychologist

The idea of a psychologist on campus has been spoken of in the attention of the student-faculty relations committee recently.

Considerable comments have been made for and against the proposal and at the present time there is a committee studying the preliminary facts.

Whether or not the notion should center around psychological guidance or vocational counseling is the main question.

There are students who feel that there is a need for this kind of professional person on campus to deal with emotional problems of college students. On faculty side, Dr. Hartley has offered his ideas that this kind of service is a part of the services that a good university provides for its students. He is currently writing letters to various universities which offer this guidance to get their opinions and views.

This proposal will directly involve students on the UPS campus. Living groups wishing to obtain more information on this proposal may contact Dr. Norman Anderson, Marcia Burdette, Janie Nelles, or Anne Doebush. These people will be available for comment or group discussion.

Mental Health Opens House

The Mental Health Research Institute at Fort Steilacoom, Washington, is hosting its seventh annual Open House Friday, October 28, from 3 to 6 p.m.

The theme is "Understanding Through Research." Each of the six departments in the Institute will have displays and exhibits demonstrating their current work and research interests.

The divisions putting on displays include those of adult correction, community services, handicapped children, juvenile rehabilitation, mental health and veterans' homes.

Research psychologist, Robert L. Schackel, adds an invitation to all University of Puget Sound students who are interested in new developments in mental research.

"Nothing great was ever achieved without enthusiasm." — R. W. Emerson

"Science is the child of curiosity, born of man's craving to understand his environment." — Unknown
Short 'n' Sweet

I own a Volvo. You wanna know what it about their pock-recorded miles and I hate means to own a Volvo? It means if you own Ingerman Bergman. All I care is that somebody a Volvo you are assured of at least seven of that Magin trench in the road between a year of carefree motoring - even over the library and the women's dormitories. It's tearing my Volvo to pieces and there we create both the solutions of my loose the regulations of my blind faith in Madison Avenue. And that's don't intend to go to Sweden, I don't care un-American - R.J.

Frederick Speaks

On Ecumenicism

"The ecumenical movement particularly as it relates to the Vatican Council II" will be discussed in University Chapel when Dr. Arthur Frederick speaks on November 3.

"Has the infallibility of the Pope's position changed? What is the likely outcome of the whole concept of birth control? Is there any movement toward priests being married?" These and other questions will be raised by the religion professor.

Formerly head of the UPS religion department, Dr. Frederick is now retired, but involved in many research projects - the ecumenical movement is a favorite.

In 1963 he visited Rome between sessions of the Vatican Council and obtained an audience with Pope Paul. His knowledge of the Catholic church and his background as a Methodist minister have led him into many ecumenical activities. He helped organize the state council of churches and was on the administrative committee for the National Council of Churches.

Another study of churches in small communities has evolved into a 10-year project. One purpose is to make sure the small church is not isolated or crowded with too many churches." The Methodist Church has commissions in small communities and at the ecumenicity center as dollars of poverty money are going into the church. There it is where the church and the church wants to determine whether it is "becoming integrated into the area in a proper way.

A graduate of Lawrence College and Garrett Seminary, Dr. Frederick received an honorary degree of Doctor of Divinity and is a member of "Who's Who in America."

Got a Buck? Wash Your Car!

By GARY EMMONS

Arnold Air Society is sponsoring an "Angel Super Car Wash" Saturday, Oct. 29, from noon until 5 p.m. at the Safeway Store, 35th & Proctor and Stan Lindwoods Chevron Station, 3722 6th Ave. For a mere dollar, which not only is worth more than a dollar, but look like a million bucks, which really wouldn't be worth a cent.

CB News

(Continued from Page 1)

in Japanese and possibly some books in the James Baldwin vein, since the students there all seem to be interested in race relations.

Logos says UPS has been lack-admissal in its sister-university relations, and that's why you spend your dollar, here is where it goes:

- Wear and tear on buckets of soap and sponges
- Personal income tax
- State sales tax
- Federal sales tax
- International car washing tax
- Johnson's war on poverty tax
- Povery's war on Johnson tax
- Stairway Armenians tax

This totals to 75c! Do you realize that you are getting your wash for only 25c? How could you pass up this offer? By coming to this car wash you can spur our country on to new and greater heights! It's your duty as a citizen of the United States of America to participate in this car wash. Uncle Arnie needs you!

Duet Arr. by Linda Booth

An original work for piano and harp will be featured tonight at 8:15 as part of the Faculty Artists Series in Jacobsen Recital Hall.

The piece was especially written for Linda Booth, by Robert Schumann, and for Linda Booth, husband and wife team.

Ron Booth as associate professor of piano at UPS and Mrs. Booth is music instructor at University Place School.

Arabesque No. 1 by Debussy, Theme and Variations by Hayden and Pieces by Carlos Salzedo are the solo numbers offered by Mrs. Booth.

Admission is by series ticket only. Six more programs are scheduled this season.

SNOOPY and the Red Baron

By Charles M. Schulz

It's a war story filled with raw drama, romance, guts, and tears. And there's a picture of Snoopy on every page. $2 at your college bookstore.

The one-and-only SNOOPY in his first full-length novel!

Logger of the Week

Halfback Corky Diseth tallied twice against Oregon College of Education to pace the Loggers to a 16-6 victory and to earn selection as Trail Player of the Week.

Diseth cracked across from the one-yard line on two occasions in the first half to give UPS a 13-0 lead at intermission, and the defense took over to preserve the win.

A junior from Puyallup, where he played for present Logger coach Bob Ryan in high school, Diseth has gained 225 yards this season in five games. He missed Eastern Washington to pace the Loggers because of an injury.

In addition to picking up 60 yards Saturday, Diseth handled the punting chores and delivered a 56-yard quick kick which was downed on the OCE one-yard line to set-up an eventual Logger score.

Loggers Meet WWSC Saturday Night

WHO is Your Ideal Date?

Who is your Ideal Date? Thousands use a Computer for a Live Answer to this Question . . .

Your IDEAL Date — such a person exists, of course. But how to get acquainted? Our computer processes 10,000 names an hour. How long would it take you to meet and form an opinion of that many people?

If you are a college student under 25 years of age, you will be matched with five persons of the opposite sex from our files, with the highest degree of compatibility with you residing nearest to you. Simply call your local representative at the number listed below, and request a questionnaire; or mail $3.00 processing fee to address below.

Each of the five will be as perfectly matched with you in interests, outlook and background as computer science makes possible.

COMPATIBILITY TESTING is nationwide, but its programs are completely localized. Thousands of college students, all sharing the desire to meet their ideal dates, have found computer dating to be easier and more acceptable.

So hurry and call for your questionnaire, or write:

Here are 7 knotty problems facing the Air Force: can you help us solve one?

1. Repairs in space. If something goes wrong with a vehicle in b, what can be done? Answers must be found, if large scale space operations are to become a reality.

2. Lunar landing. The exact composition of the lunar surface, as well as structural and propulsion characteristics of a space vehicle, enter into this problem. Important study remains to be done— and the Air Force officer, you could be one to do it.

3. Life-support biology. The filling of metabolic needs over the entire extended period of time in space is one of the most fascinating subjects that Air Force science must investigate. The results promise to have ramifications for our lives on earth, as well as in outer space.

4. Space orientation. The orbital problems of a spacecraft, including its ability to maneuver over selected points on the earth, are of vital importance to the military utilization of space. There are plenty of assignments for young Air Force physicists in this area.

5. Synergetic plane changes. The ability of a spacecraft to change attitude can also be crucial to space operations. Where but in the Air Force could it be? So it's the chance to work on such fascinating projects right at the start of your career?

6. Space propulsion. As our space flights cover greater and greater distances, propulsion—more than anything else—will become the limiting factor. New fuels and new propulsion techniques must be found. If young engineers are to keep on exploring the mysteries of space, the Air Force must be involved.

7. Pilot performance. Important tests must be made to determine how the pilots of manned space vehicles react to prolonged periods away from the earth. Of course, not every new Air Force officer becomes involved in research and development right away. But where the most exciting advances are taking place, young Air Force scientists, administrators, pilots, and engineers are on the scene.

Air Force ROTC, Superior students may qualify for Air Force scholarships. Many colleges and universities also have special 2-year Air Force ROTC programs. For details, contact your nearest Air Force representative, or mail the coupon today.
